RELEASE NOTES AND NOTICES

This section provides information about what is new or changed, including urgent issues, Software & documentation updates, maintenance and new releases.

- ‘Updates’ are the term used to describe significant changes to our public source code. These technical documents are now contained within our public source code.

1.1 Version 0.0.1

This is the first release/ draft of this technical document.

1.1.1 Older Versions

There are no older versions of this document, however a table has been made so that enteries can be made. We’re also still exploring how exactly we will make links to the older versions possible. Perhaps a PDF snapshot will do, before the directory is overwritten with the next version. The sphinx methodology is new to our team, we’re still exploring this and other options for maintaining technical documents for this project:

Table 1: Table 1.0 - Older Versions of this Document

archieve date	version	description	download link
no date	0.0.0	N/A	N/A

1.1.2 Version 0.0.0

N/A

1.2 Known and Corrected Issues

Below is a table of pending issues which have been reported to our team. These issues will be cleared from this list as and when they are remedied.

Table 2: Table 1.1 - Known Issues

date	version	subject	description
01-11-2018	0.0.1	N/A	no doubt many issues to report - first draft only

Comments - none

1.3 Recently Updated Topics

Nothing significant to report

INTRODUCTION

This document is intended to present and explain financial data concerning Wave®, in a way that can be easily understood.

Wave® strives to operate and report on its banking and finances to a standards consistent of any British Company. A financially literate person should have no difficulty navigating through the financial data in this report.

However, unlike most companies, Wave® simultaneously operates its own bespoke and internal cryptocurrency banking system and services. This new trend in tech business financials is most commonly referred to as a Decentralised Autonomous Organisation (DAO). To fully understand this report, readers are advised to briefly research DAO's online before proceeding.

The Wave® DAO is able to re-write this financial report each time a transaction occurs in order it remains concurrent. Furthermore, it will autonomously summarise these changes and place a link to the previous report in the log of the latest report.

The Wave® DAO even replaces written and signed legal agreements with encoded scripts known as cryptocurrency smart contracts. This is essential for when our product must indentify, contracts-with and pay our customers Internet Service Provider's (ISP's), which it does fully autonomously. Unique cryptographic addresses are also used to replace government issued identities to eliminate fraud and corruption. Wave® also makes redundant conventional company shares (and promissory notes and interest payments to lenders) by issuing cryptographic 'Royalty' and 'Interest' Tokens.

Traditionally the asset (Wave®) would be owned by the company, and shares in the company would determine ownership. In the case of Wave® a form of cryptocurrency we call 'Wave® Royalty Tokens (WRT)' are issued in place of shares and can be stored on the beneficiaries mobile phones (if they so desire) on free cryptocurrency wallets which are downloadable from the Wave® website: makeitwave.com.

True ownership of this organisations core asset is subsequently determined by whomever holds these Tokens, making shares in the company, for the best part, redundant. The DAO is effectively affording the company the privilege of being able to administrate it, subject to preset conditions and rules e.g. the company must hold the most Royalty Tokens.

The initial sale of these Tokens is a process called Initial Coin Offering (ICO). Details of the performance of the Tokens ICO's can be located under the Master Registers within this document.

2.1 Review & Purchase

The Wave® DAO activity will appear on the Ethereum blockchain for [public record](#). To purchase Wave® Tokens please visit the investment section of our website: makeitwave.com

WAVE® TOKENS - SUMMARY

3.1 Wave® Royalty Token (WRT)

Unlike companies which distribute funds to shareholders quarterly, or yearly, the Wave® DAO is able to distribute royalties to WRT holders in real-time (daily/ hourly). This is achieved using Ethereum Cryptocurrency and Blockchain/ Smart Contract Technology. Wave® pools revenue from the networks advertising & cryptocurrency mining activity and autonomously allocates and distributes this cryptocurrency to the wallet addresses listed on the latest WRT Master Register.

Table 1: Wave® Royalty Tokens (WRT) - Master Register

3.2 Wave® Interest Token (WIT)

The same delivery methods used to give investors in Royalty Tokens their royalties, are employed by the Wave® DAO to offer lenders real-time interest on loans made to Wave®. **Interest Tokens** can be used to receive real-time interest on loans, in much the same way royalties from our network are autonomously paid to Royalty Token holders.
